In men, a score of 4 or more is optimal for identifying hazardous drinking. In women, a score of 3 or more is optimal for identifying hazardous drinking.

If you scored 3 or more, please speak with your SACO/DAPA about a self-referral to CSACC for an Alcohol and/or Drug Screening. If you have additional questions regarding your answers, call CSACC at 703-784-3502 and ask to speak with a counselor.
